

IMPORT DATA USING TRANSFORM MAPS (SPREADSHEET)

Team ID	SWTID-2026-2971
Team Leader	Gowsik Raja S
Team Members	Shrija M; Swetha M; Sivaram A

Step 1 — Prepare the sample spreadsheet

Step description: Prepare the sample employee data in Google Spreadsheet and download it as Sample Spreadsheet.xlsx.

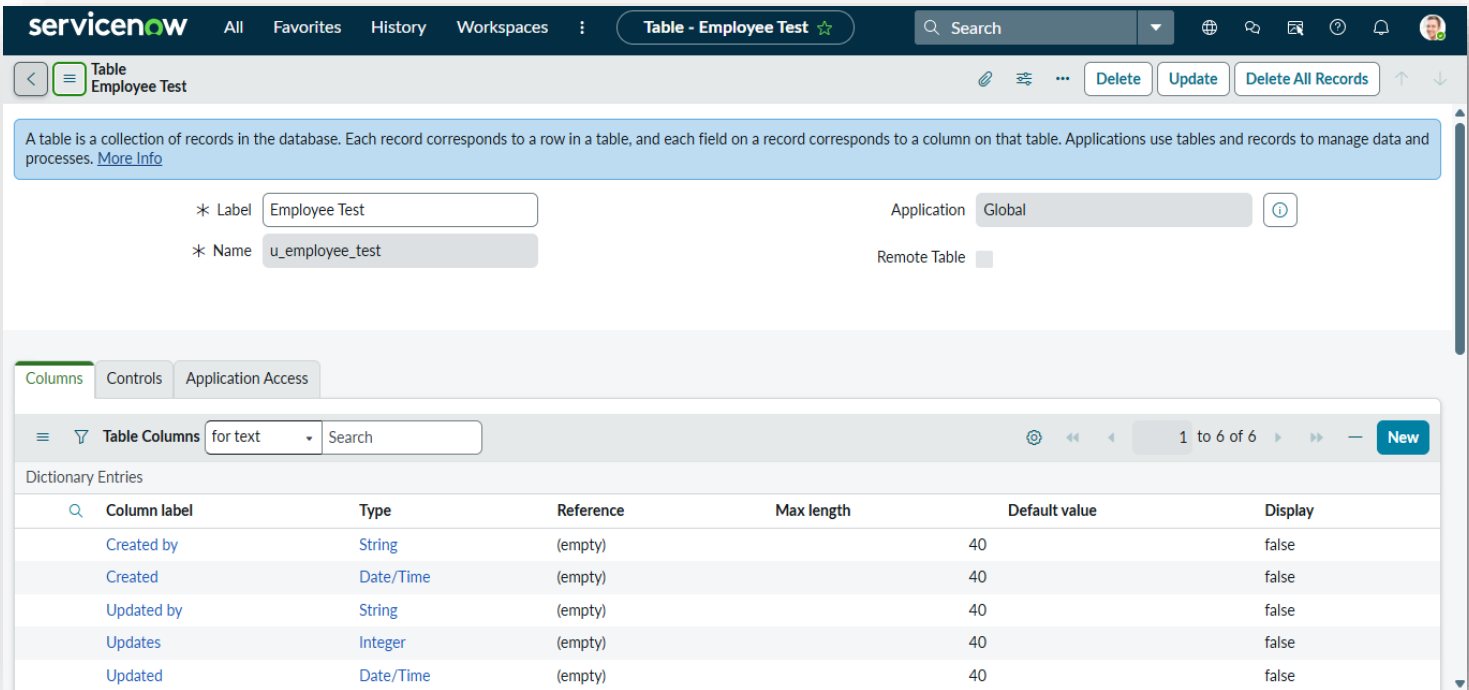

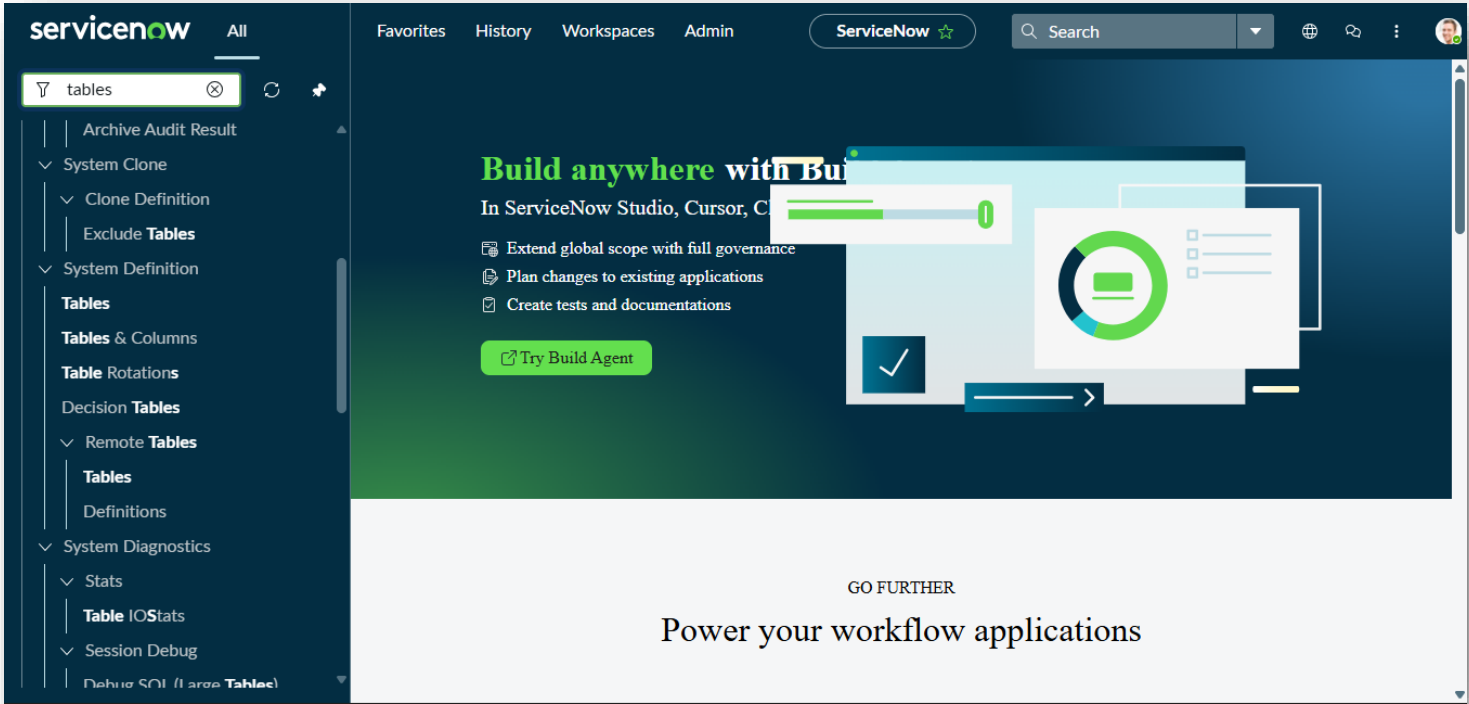

The screenshot displays a Google Spreadsheet titled "Sample Spreadsheet" with the following data:

Employee ID	Name	Email	Department	Location
SB-0001	Ratan Kumar	test1@gmail.cor	ServiceNow	Hyderabad
SB-0002	Sandeep Guja	test2@gmail.cor	ServiceNow	Hyderabad
SB-0003	Meghana Katoju	test3@gmail.cor	ServiceNow	Hyderabad
SB-0004	Ajay Kumar	test4@gmail.cor	ServiceNow	Hyderabad
SB-0005	Bitla Sai Prasad	test5@gmail.cor	ServiceNow	Hyderabad
SB-0006	Sushma Ganji	test6@gmail.cor	ServiceNow	Hyderabad
SB-0007	Yaswanth Nikku	test7@gmail.cor	ServiceNow	Hyderabad
SB-0008	Prashanth Redd	test8@gmail.cor	ServiceNow	Hyderabad
SB-0009	Praneeth S	test9@gmail.cor	ServiceNow	Hyderabad
SB-0010	Ravi Teja	test10@gmail.cc	ServiceNow	Hyderabad
SB-0011	Abhishek S	test11@gmail.co	Salesforce	Hyderabad
SB-0012	Rakesh Bhooma	test12@gmail.cc	Salesforce	Hyderabad
SB-0013	Mounika K	test13@gmail.cc	Salesforce	Hyderabad
SB-0014	Sushanth J	test14@gmail.cc	Salesforce	Hyderabad
SB-0015	Srinu Nandipalli	test15@gmail.cc	ServiceNow	Hyderabad

The Gemini sidebar on the right shows suggestions for actions like "Create a project tracker", "Create a 12-month cash flow forecast", and "Create a departmental budget template". It also includes a search bar and a "Beta" label.

Step 2 — Create the Employee Test table

Step description: Create the custom table with Label “Employee Test” and Name “u_employee_test”. Add Employee ID, Employee Name, Email, Department, and Location as String fields.

Step 3 — Load the spreadsheet into an Import Set

Step description: Use Load Data, create the Employee Import import table, use the generated name “u_employee_import”, and upload the spreadsheet.

The screenshot shows the 'Load Data' configuration page in ServiceNow. The page has a dark blue header with the 'servicenow' logo and navigation links: All, Favorites, History, Workspaces, and a 'Load Data' button with a star icon. A search bar is on the right. Below the header, a breadcrumb trail shows '< Load Data' and a 'Submit' button. The main form is divided into two sections. The 'Import set table' section has two radio buttons: 'Create table' (selected) and 'Existing table'. Below these are a 'Label' field with the value 'Employee Import' and a 'Name' field with the value 'u_employee_import'. The 'Source of the import' section has two radio buttons: 'File' (selected) and 'Data source'. Below these are a 'File' field with a 'Choose File' button and the text 'Sample Spreadsheet.xlsx', a 'Sheet number' field with the value '1', and a 'Header row' field with the value '1'. A 'Submit' button is at the bottom of the form.

The screenshot shows the 'Progress' and 'Next steps' page in ServiceNow. The page has a dark blue header with the 'servicenow' logo and navigation links: All, Favorites, History, Workspaces, and a 'ServiceNow' button with a star icon. A search bar is on the right. Below the header, a breadcrumb trail shows '< Progress' and a 'Submit' button. The 'Progress' section shows the status of the import process. It includes a table with the following data: Name: ImportProcessor, State: Complete, Completion code: Success, and Message: Processed: 15, inserts 15, updates 0, errors 0, empty and ignored 0, ignored errors 0 (0:00:02.534). The 'Next steps...' section lists four actions: 'Import sets' (Go to the import sets for this data load), 'Loaded data' (Go to the newly imported data inside the staging table: u_employee_import), 'Create transform map' (Create a transform map for the newly staged data), and 'Import log' (View the import log).

[Import log](#) View the import log

Step 4 — Create and configure the Transform Map

Step description: Create the Transform Map named “Sample Spreadsheet Import”. Set Employee Import as the Source Table and Employee Test as the Target Table. Use Auto Map Matching Fields and Mapping Assist, then save.

The screenshot shows the 'Table Transform Map - New Record' form in ServiceNow. The form is configured with the following details:

- Name:** Sample Spreadsheet Import
- Source table:** Employee Import [u_employee_im...]
- Target table:** Employee Test [u_employee_test]
- Application:** Global
- Created:** (empty field)
- Order:** 100
- Run script:** ☐
- Active:** ☒
- Run business rules:** ☒
- Enforce mandatory fields:** No
- Copy empty fields:** ☐
- Create new record on empty coalesce fields:** ☐

Below the form fields, there is a 'Submit' button and a 'Related Links' section with the following links:

- [Auto Map Matching Fields](#)
- [Mapping Assist](#)

The screenshot shows the 'Table Transform Map - Sample Spreadsheet Import' form in ServiceNow, specifically the 'Field Maps' tab. The form is configured with the following details:

- Name:** Sample Spreadsheet Import
- Source table:** Employee Import [u_employee_im...]
- Target table:** Employee Test [u_employee_test]
- Application:** Global
- Created:** (empty field)
- Order:** 100
- Run script:** ☐
- Active:** ☒
- Run business rules:** ☒
- Enforce mandatory fields:** No
- Copy empty fields:** ☐
- Create new record on empty coalesce fields:** ☐

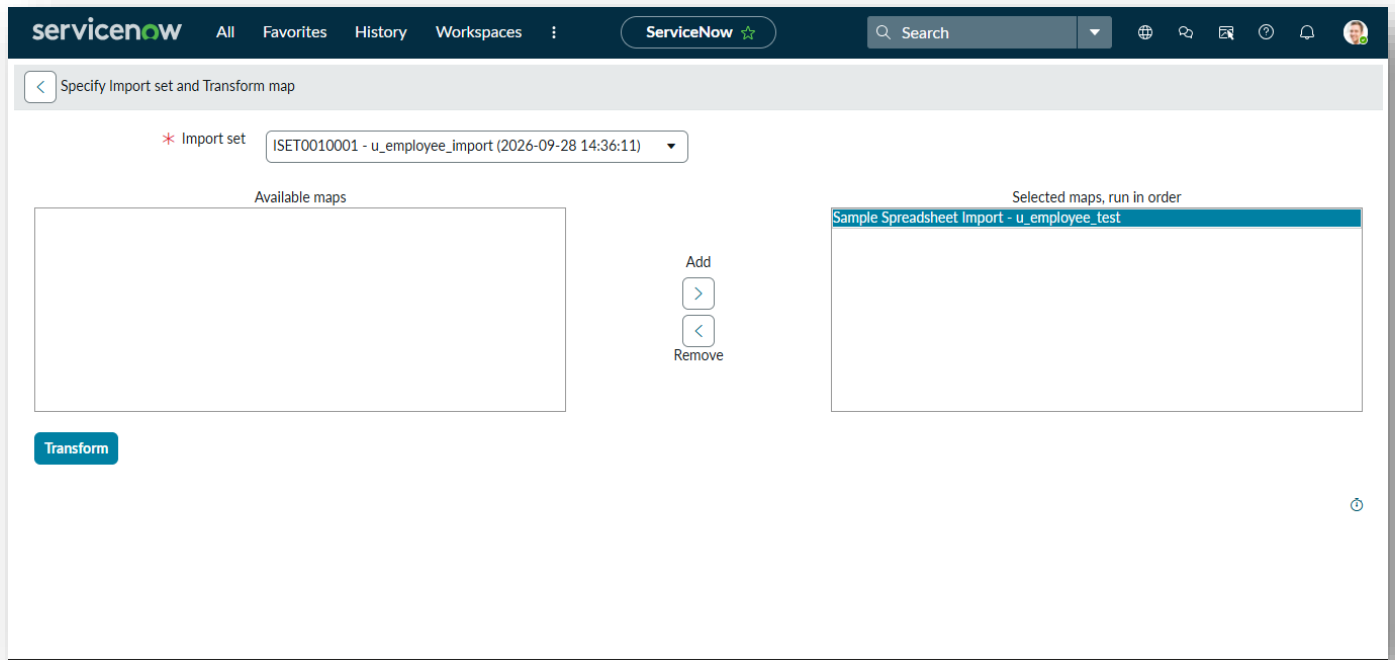

Below the form fields, there is a 'Submit' button and a 'Related Links' section with the following links:

- [Auto Map Matching Fields](#)
- [Mapping Assist](#)
- [Validate Coalesce Fields](#)
- [Transform](#)
- [Index Coalesce Fields](#)
- [Run Point Scan](#)

The 'Field Maps' tab is active, showing a table with 4 field maps. The table has the following columns: Source field, Target field, and Coalesce. The first row is selected, showing the mapping for 'u_department'.

Source field	Target field	Coalesce
u_department	u_department	false
u_email	u_email	false
u_employee_id	u_employee_id	false
u_location	u_location	false

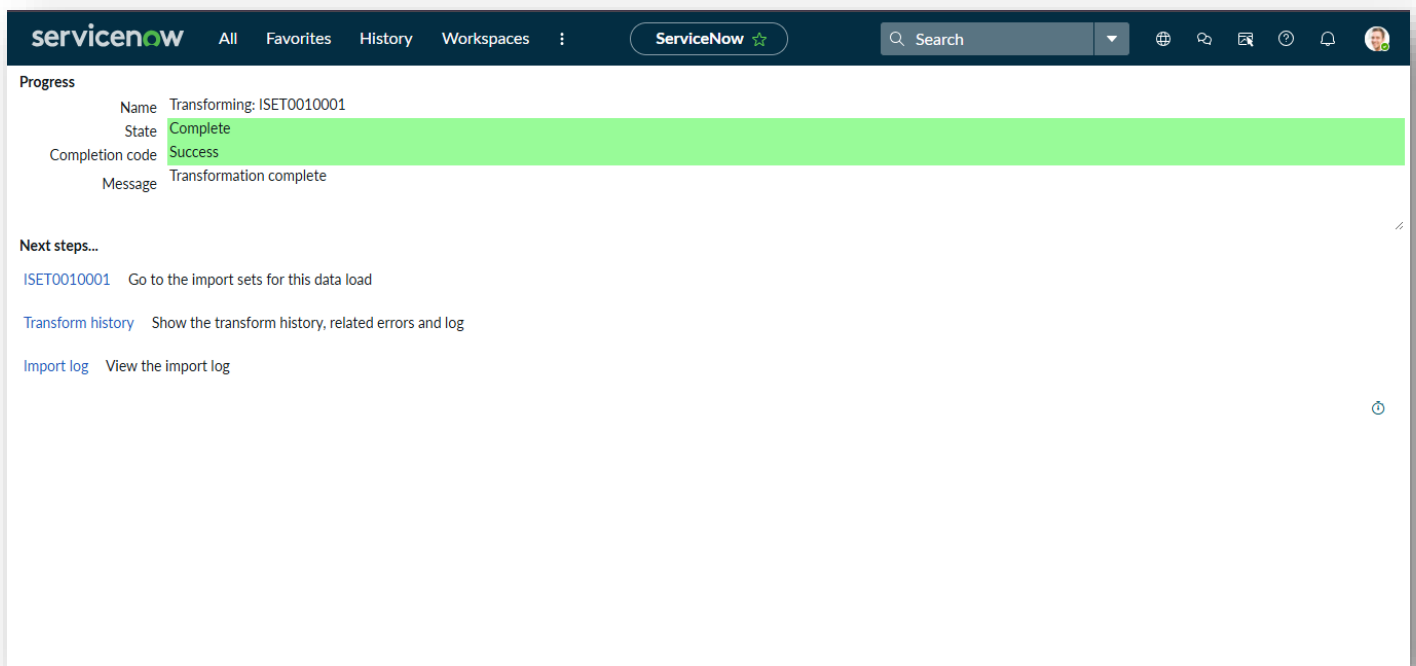

The table is paginated, showing 1 to 4 of 4 rows.

Step 5 — Run the transform

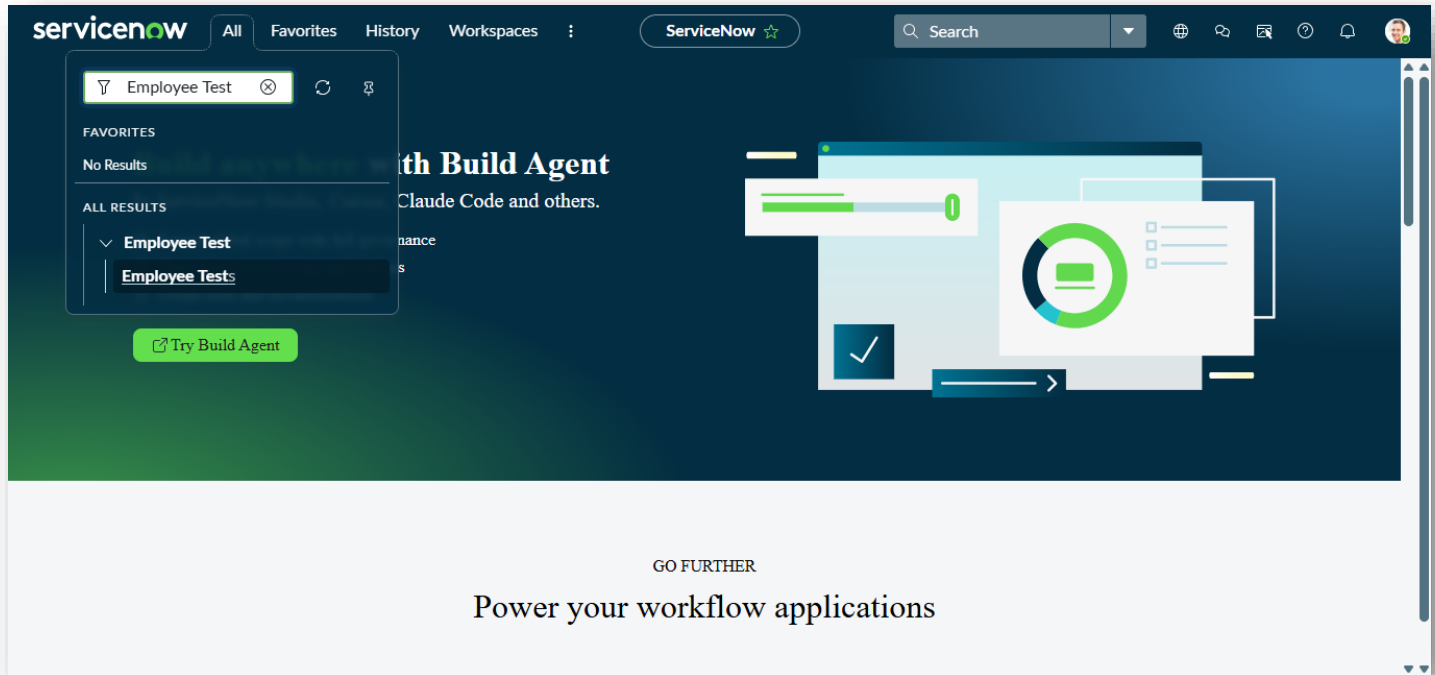

Step description: Use Transform to process the imported data and verify that the transformation completes successfully.

Screenshot — Milestone 2

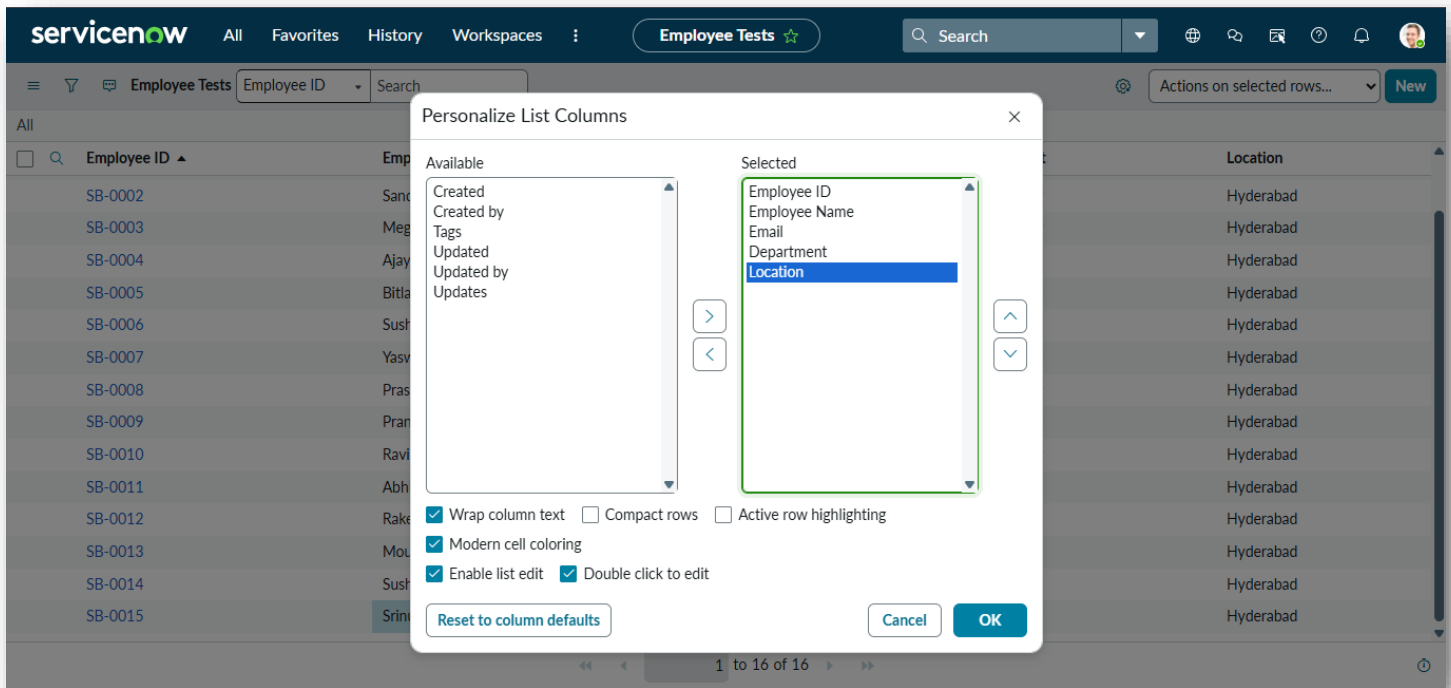

Step 6 — Verify the imported employee records

Step description: Open Employee Test and verify that the imported employee records are present. Use Personalised List Columns to arrange the displayed fields.

SB-0014	Sushanth J	test14@gmail.com	Salesforce	Hyderabad	
SB-0015	Srinu Nandipalli	test15@gmail.com	ServiceNow	Hyderabad	

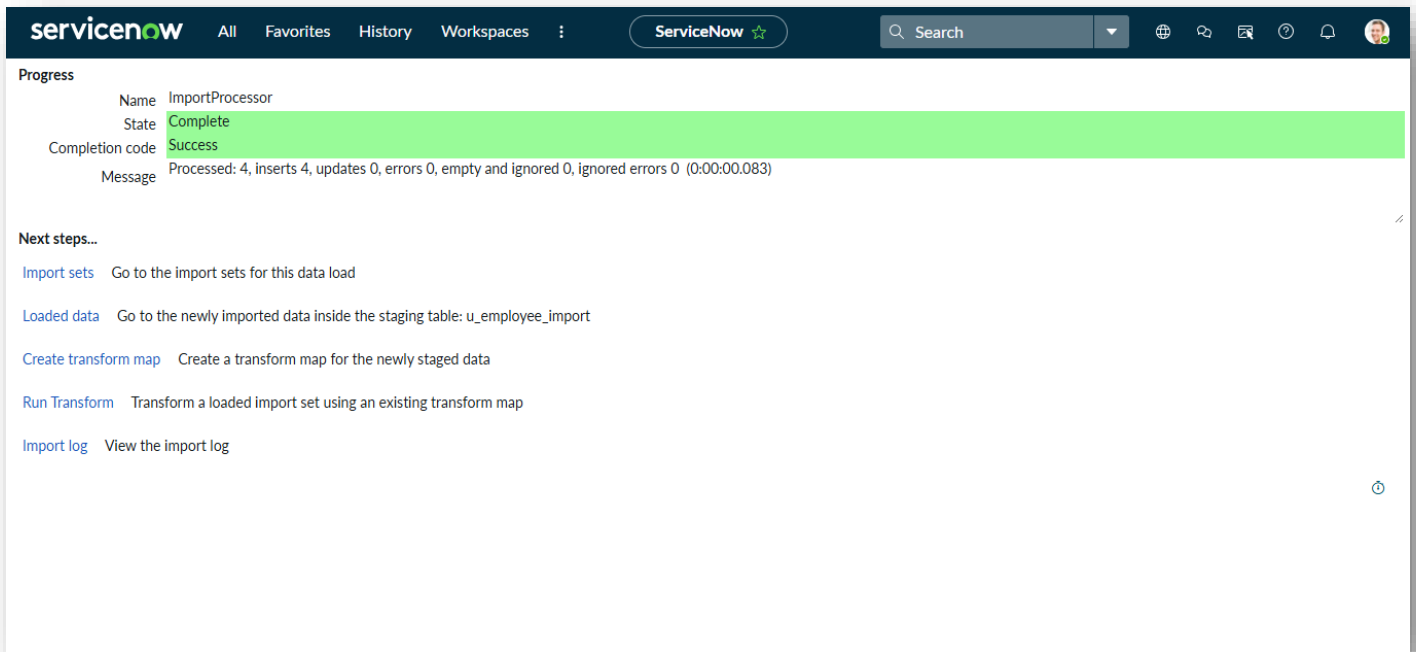

Step 7 — Configure Coalesce

Step description: Open Sample Spreadsheet Import, go to Field Maps, change the selected field's Coalesce setting from False to True, and save.

Step 8 — Import changed and new data

Step description: Load the updated spreadsheet into the existing Employee Import table, use sheet 1 with header row 1, submit the load, confirm Completed and Success, and run the Transform.

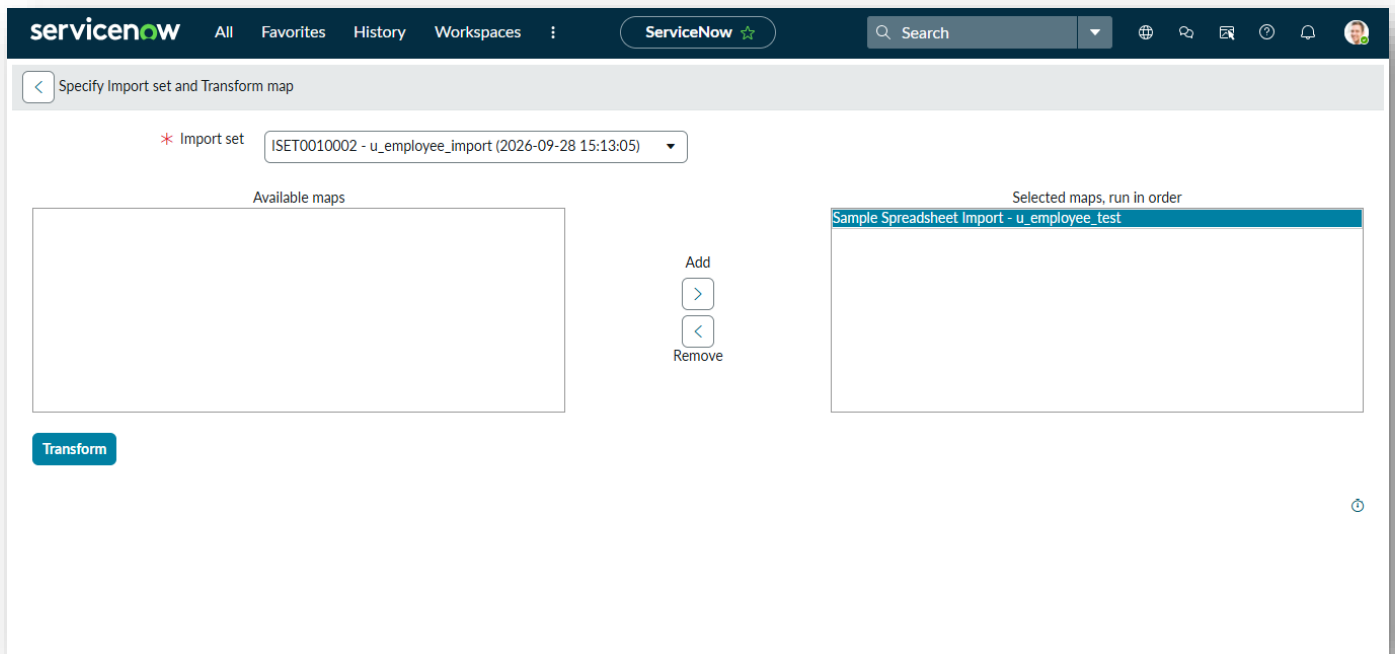

The screenshot shows the ServiceNow interface for the ImportProcessor. The top navigation bar includes the ServiceNow logo, tabs for All, Favorites, History, and Workspaces, a search bar, and a user profile icon. The main content area is titled "Progress" and displays the following information:

- Name: ImportProcessor
- State: Complete
- Completion code: Success
- Message: Processed: 4, inserts 4, updates 0, errors 0, empty and ignored 0, ignored errors 0 (0:00:00.083)

Below the progress section, there is a "Next steps..." section with the following links:

- [Import sets](#) Go to the import sets for this data load
- [Loaded data](#) Go to the newly imported data inside the staging table: u_employee_import
- [Create transform map](#) Create a transform map for the newly staged data
- [Run Transform](#) Transform a loaded import set using an existing transform map
- [Import log](#) View the import log

The screenshot shows the ServiceNow interface for configuring a Transform Map. The top navigation bar is identical to the previous screenshot. The main content area is titled "Specify Import set and Transform map" and includes the following elements:

- A dropdown menu for "Import set" with the value "ISET0010002 - u_employee_import (2026-09-28 15:13:05)".
- A section titled "Available maps" with a large empty box.
- A section titled "Selected maps, run in order" with a list containing "Sample Spreadsheet Import - u_employee_test".
- Buttons for "Add" (a right arrow) and "Remove" (a left arrow).
- A "Transform" button at the bottom left.

Step 11 — Create report

Step description: Create a report using Employee Test, choose Pie Chart, group by Department, and use Count.

A screenshot of the 'Create a report' wizard in ServiceNow. The wizard is divided into four tabs: 'Data', 'Type', 'Configure', and 'Style'. The 'Data' tab is active, showing the 'Report name' field with the value 'Employees by Department', the 'Source type' dropdown set to 'Table', and the 'Table' dropdown set to 'Employee Test [u_employee_test]'. The 'Report Title' field is set to 'Employees by Department'. The 'Table: Employee Test [u_employee_test]' section shows a filter set to 'All'. The 'Description' field is empty, with a note stating 'There is no description for this table. To add a description, please contact your admin.' The 'Next' button is visible at the bottom left. The right side of the wizard shows a 'Create your report with Analytics Q&A' section with a text input field 'What do you want to see?' and an 'Ask' button.

Step 14 — Create the Employee Analytics Dashboards dashboard

Step description: Create Employee Analytics Dashboards and add the three reports using Share → Add to Dashboards. Dashboard sharing can be restricted by Users, Groups, or Roles.

The screenshot shows the 'Dashboard New record' form in ServiceNow. The form has a header with 'Dashboard New record' and a 'Submit' button. The main form area contains the following fields: 'Name' (Employee Analytics Dashboard), 'Group' (empty), 'Order' (empty), 'Restrict to roles' (empty), 'Active' (checked), and 'Owner' (System Administrator). There is a 'Disable multiple element selection' checkbox. At the bottom, there is a 'Submit' button and a 'Related Links' section with a link to 'View Dashboard'.

Final Verification

- Employee Test contains the imported employee records.
- The Transform Map executes successfully.
- Coalesce behavior produces the documented insert, update, and ignore outcomes.
- The three requested reports are created.
- The reports are added to Employee Analytics Dashboards.
